application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-70 rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims of U.S. Patent No. 7,053,998 B2 in view of 7,045,760 B2 and U.S. Patent No. 7,053,998 B2 in view of 7,053,809 B2 as shown in the chart below.

*Allowable Subject Matter*

3. Claims 1, 38, & 58 objected to as being a rejected base claim, but would be allowable if a timely filed terminal disclaimer is filed and/or rewritten to overcome the 35 U.S.C. §101 and including all of the limitations of the base claim.

The following is a statement of reasons for the indication of allowable subject matter:

Regarding claim 1, the prior art fails to disclose or make obvious "a second photo detector array sensitive to the at least one defined wavelength of light, said second photo-detector array positioned proximate to said first photo detector array" and in combination with the other recited limitations of claim 1. Claims 2-37 would be allowed by virtue of dependency on the allowed claim 1.

Regarding claim 38, the prior art fails to disclose or make obvious "forming a second photo detector array sensitive to the at least one defined wavelength of light in a vicinity of the first photo detector array" and in combination with the other recited limitations of claim 38.

Claims 39-57 would be allowed by virtue of dependency on the allowed claim 38.
